

Washing instructions

General:

Use of the laundry room is possible at any time.

During washing

We ask you to follow the operating instructions of the individual devices exactly. **Empty the pockets** of the garments thoroughly before each washing and drying cycle, as utensils can cause costly malfunctions and damage. **Bras with underwires** should be washed in a special laundry bag.

After washing:

Please remove the laundry from the washing machine or tumble dryer immediately after the washing or drying process is complete.

The following cleaning operations must be carried out:

- Clean washing powder drawer and dry washing machine including rubber seals
- Clean the filter of the tumble dryer

Damage and malfunctions:

Any damage or malfunctions occurring on the device must be reported immediately.

Hand over the laundry room the way you like to do it yourself: clean and tidy.

We and your neighbours thank you for your consideration.
